

Healix Teeth Whitening and In-office Bleaching System

Healix Teeth Whitening and In-office Bleaching System is most popular teeth whitening system in the country. It has a very powerful and stable LED Lights. It works very close to the hydrogen peroxide gel for speeding up hydrogen peroxide catalysis to improve the final result.

Whitelite Unit

Cheek Retractor

Protective Eyewear

Features

- ▶ It comes with 10 cheek retractors which can be directly attached to the system and suction.
- ▶ It is compatible with all bleaching materials
- ▶ It has 8 LED Lights in arch form.
- ▶ It does not occupy much space.
- ▶ Apart from teeth whitening this system can also be used to cure orthodontic brackets and full mouth composite restoration.
- ▶ Royal Blue spectrum allows to cure the rubber ram/gingival barrier at one time and helps to speed up whitening without necrosis risk.
- ▶ LED Lights helps to produce lowest possible sensitivity and heating unlike other plasma and other infra-red lights.

The Propytec lamp includes 8 high intensity LEDs providing 40W of extreme luminous power of 460nm wavelength.

Very powerful and stable, the lamp works close to the gel for speeding up hydrogen peroxide catalysis in order to improve final result.
